PURPLE COMPUTER

For Grown-ups

Videos and help: purplecomputer.org/help

Hold Esc for a second to open the Parent Menu.

Install for good. Put Purple on the laptop so the Purple Key isn't needed.

Kid Profiles. Each kid gets their own computer name, saved work and Time Travel.

Littles Mode. One activity with no menus: Music, Art, or sounds with a dark screen.

Rooms. Turn rooms on or off, like **Write**, a quiet page for stories.

Sound. Set a volume limit. 0 makes Purple silent.

Parent PIN. Keeps the Parent Menu for grown-ups.

Printing

Plug in a USB printer, then Esc P. Each page is signed with the computer's name.

Make Purple your family's with Purple Studio →

PURPLE COMPUTER

Purple Studio

studio.purplecomputer.org

Put your family into Purple.

Make a **Purple Pack** on any computer. Everything stays in your browser; nothing is uploaded.

Your words. Type `grandma` and see her photo.

Your voice. Record yourself saying each letter.

New sounds. Shape instruments like a kazoo or a harp.

Your colors. Pick the screen and paint colors.

New rooms. Stories, games and worlds to walk around.

How it works

1. Try everything on a real Purple, right in your browser
2. Download your Purple Pack to any USB drive
3. Plug it into Purple and press **Add**
